The diagram illustrates a temporary island at a four-way intersection. The intersection is divided into four quadrants by a vertical centerline and a horizontal centerline. In the top-right quadrant, a temporary island is shown with a hatched area and a dashed line indicating its taper. The taper is labeled "100' TAPER" and "5 DEVICE MIN". The island is marked with a circle containing the number "61". A distance "S" is indicated from the island to the intersection. In the top-left quadrant, a circle containing the number "2" is shown at a distance "S" from the intersection. In the bottom-left quadrant, a circle containing the number "2" is shown at a distance "S" from the intersection. In the bottom-right quadrant, a circle containing the number "61" is shown at a distance "S" from the intersection. A label "TEMPORARY ISLAND (2)" points to the island. Arrows indicate traffic flow: straight through, left turn, and right turn for each direction.

The diagram illustrates a four-lane highway interchange with a central median and side ramps. The central median is marked with a dashed line and a solid line. The side ramps are marked with a dashed line and a solid line. The diagram includes various traffic signs and dimensions:

- Top Section:** Shows a 100' TAPER and a 5' DEVICE MIN. A sign (2) is located on the left side of the ramp, and a sign (60) is located on the right side of the ramp. The distance between the signs is labeled S.
- Bottom Section:** Shows a sign (2) on the left side of the ramp, a sign (60) on the right side of the ramp, and a sign (3) on the left side of the ramp. The distance between the signs is labeled S.
- Central Median:** Shows a sign (60) on the left side of the median, a sign (6) on the right side of the median, a sign (5) on the right side of the median, and a sign (1) on the right side of the median. The distance between the signs is labeled S.
- Dimensions:** The diagram includes dimensions for the buffer length (B), T2/2, T2, and S.

- DRAWING NOT TO SCALE. FOLLOW DIMENSIONS.

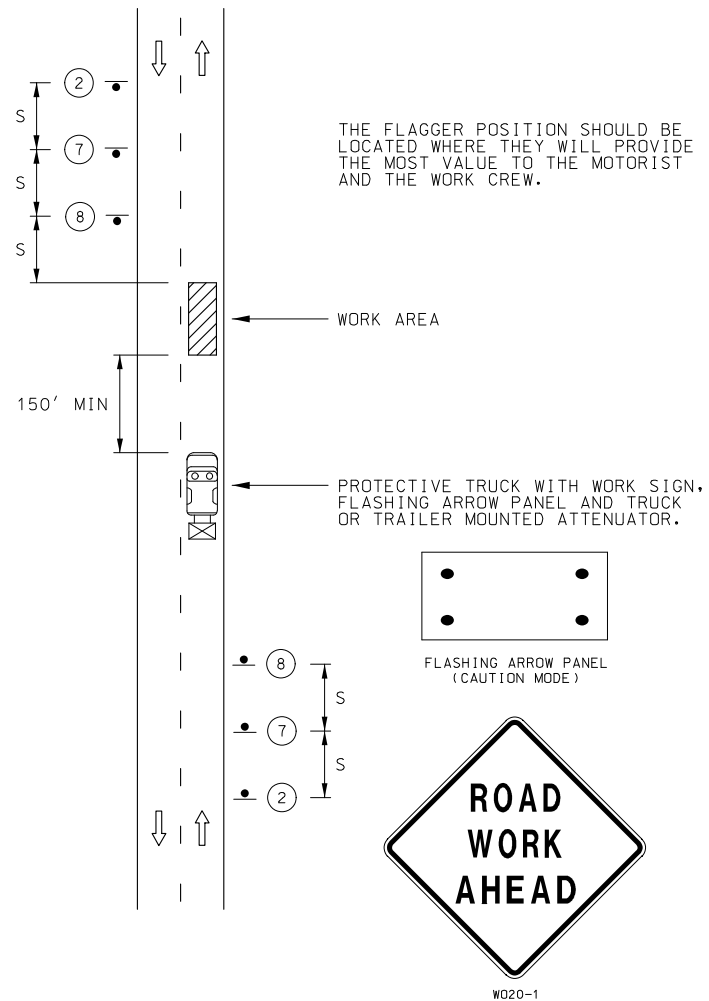

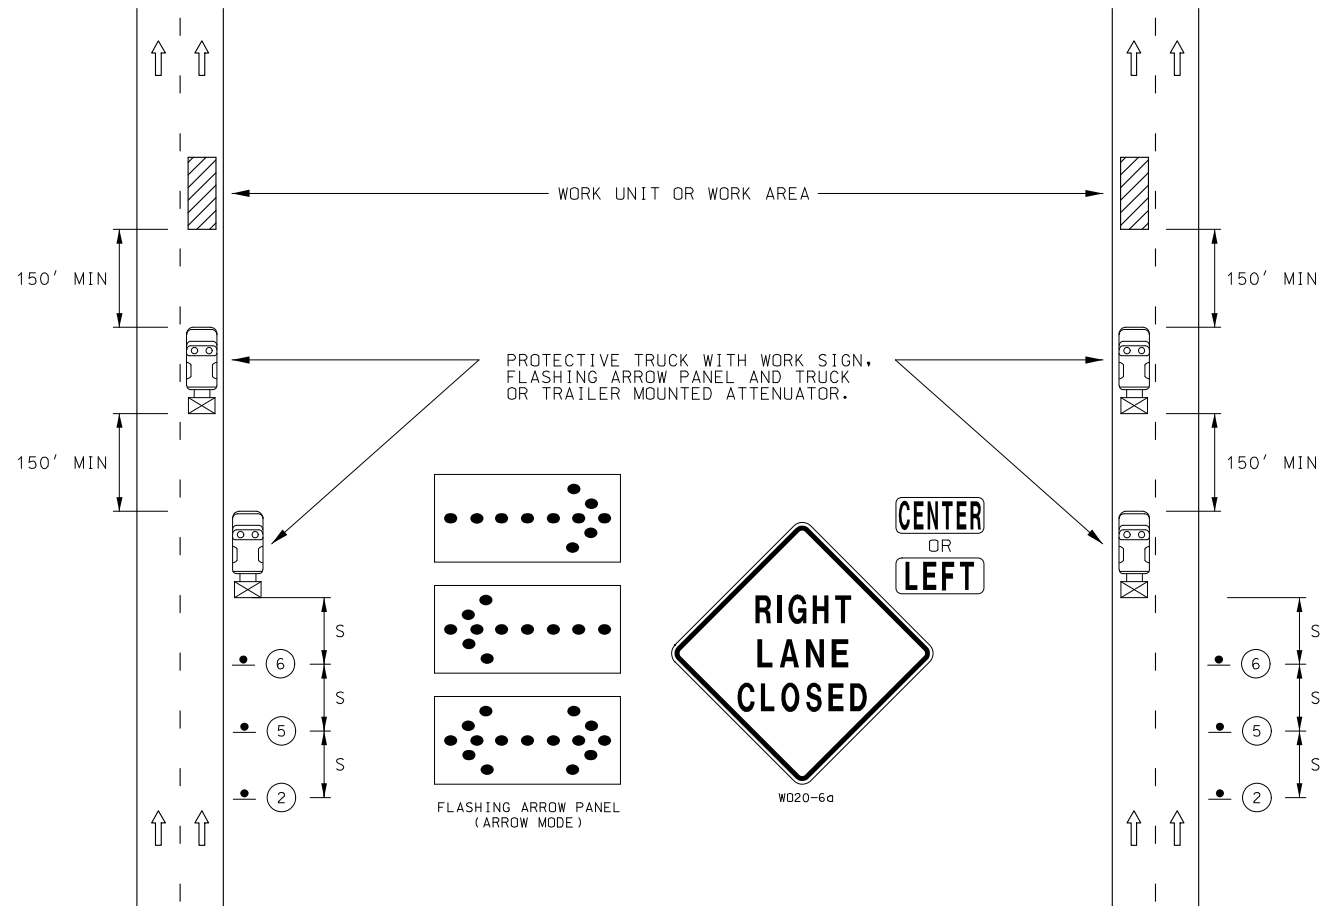

10 FEET DEVICE SPACING IS USED WHERE TRAFFIC IS GUIDED ACROSS DOUBLE YELLOW LINES OR OTHER CONFLICTING PAVEMENT MARKING. ALL OTHER SPACINGS ARE ONE-HALF OF THE SPACING.
