JOB SPECIAL PROVISIONS (BRIDGE)

A. CONSTRUCTION REQUIREMENTS

1.0 Description. This provision contains general construction requirements for this project.

2.0 Construction Requirements. The plans and the asbestos and lead inspection report for the existing structure(s) and the geotechnical report for the new structure(s) are included in the contract in the bridge electronic deliverables zip file for informational purposes only.

2.1 In order to assure the least traffic interference, the work shall be scheduled so that the bridge closure is for the absolute minimum amount of time required to complete the work. The bridge shall not be closed until material is available for continuous construction and the contractor is prepared to diligently pursue the work until the closed bridge is opened to traffic.

2.2 Provisions shall be made to prevent any debris and material from falling into the waterway. If determined necessary by the engineer, any debris and material that falls below the bridge outside the previously specified limits shall be removed as approved by the engineer at the contractor's expense.

2.3 Provisions shall be made to prevent damage to any existing utilities. Any damage sustained to the utilities as a result of the contractor's operations shall be the responsibility of the contractor. All costs of repair and disruption of service shall be as determined by the utility owners and as approved by the engineer.

3.0 Method of Measurement. No measurement will be made.

4.0 Basis of Payment. Payment for the above described work will be considered completely covered by the contract unit price for other items included in the contract.

B. ALTERNATE STRUCTURES

1.0 Description. This work shall consist of constructing either of the two proposed single span bridges, a prestressed concrete spread box beam structure or a steel plate girder structure. All alternates shall be in accordance with the bridge plans, standard specifications and the job specials provisions.

2.0 Bidding. Separate pay items, descriptions and quantities are included in the itemized proposal for each alternate. The bidder shall only bid the roadway and bridge items that pertain to one of the alternates. The bidder shall bid Sections 1 and 2 for the proposed bridges. The bidder shall bid Sections 3 and 4 for the prestressed concrete spread box beam structure. The bidder shall bid Sections 5 and 6 for the steel plate girder structure. The bidder shall bid only one of the alternates and leave the contract unit price column blank for any pay items listed for the other alternates.

3.0 Basis of Payment. All work needed to complete the roadway and structure(s) will be considered completely covered by the items in each alternate.
