									49	Apr 17, 2024	marzua1	(\$46,381.80)	The random QC test representing the second 409 CY of Lot 48 had low air content. The test results were 4.0% air and 0.25" slump. Lot 48 was paved on 4-15-24 from log mile 189.203 to log mile 189.420. The first random representing the first 500 CY tested in spec. The five trucks following the second random also tested in spec. These tests limit the area represented by the failed test to be between CY 501 and CY 720. Using the length paved and the cubic yards paved a rate of 1.25' per CY was established (1140' / 909 CY). 220 CY x 1.25' per CY = 275' The pavement was 22' wide resulting in (275' x 22' / 9) = 672.2 SY Item adjustment calculation: 672.2 SY x \$69.00 = \$46,381.80

		Contract Adjustment				2022		The intended use of this material was to fill in the rumble strips in a section of shoulder where replacement was omitted. The contractor obtained this material on the basis of verbal preapproval to perform this work, but it was later determined that it is MoDOT's preference to leave the rumble strips as-is, and allow traffic to cross them temporarily. Since this material will not be incorporated into the project, it was delivered to a MoDOT Central District Bridge Crew facility. This adjustment is to compensate the contractor for associated costs in accordance with EPG article 108.11
