The spread sheet helped us break down day by day what the starting gallons in the truck were and then by taking the ending amount that day we were able to follow on each time they refueled and how much and do the math on how much oil they used each day. The numbers above represent the amount negative or positive that day actually used for example (8/20 we reported 108 more gallons than what was actually used that day) so we have gone back and showed what the real amount used that day would have been. For Reference the amount delivered to job before temperature corrections is 45255 (GAL) For Reference after the corrections (the theoretical maximum amount they could have used) is 43809 (GAL) The locations of where the tack used will be located in the Roadway Reports, all these numbers will correspond with the locations and what took place that day. 6131014 FULL DEPTH PAVEMENT REPAIR SAW CUT (FOR 1/7/25 1/7/25 -24.00 LF 43.6 RT OF CL SBL 43.6 RT OF CL SBL 0140 Locations - LF - Cushion - Replacement 6122040 WORK ZONE CRASH CUSHION (NARROW) 1/8/25 EA 1@ Each SBL Location - which is 10 barrier walls. 179.206 RT OF CL SBL 5001 1/15/25 10.00 160.193 RT OF CL SBL INSTALLATIONS--160.193 US 61 Overpass - 87.5 - 1 161.999 Box Culvert - 87.5 - 1 RELOCATIONS-163.006 Route U Overpass - 87.5 - 1 - 4 163.908 UP RR Overpass - 87.5 - 1 164.940 US 61 Overpass - 87.5 - 1 166.828 Route EC Overpass - 87.5 - 1 171.868 Route IE Overpass - 87.5 - 1 176.94 MO 162 Overpass - 87.5 - 1 179.206 Route T Overpass - 87.5 - 1 All of these locations are shown in the plans, what the plans did not account for is all of the safety precautions so this is being entered after we got a change order approved.
